Admission Letter

Dear Admissions,

Exploring possibilities in the field of economics programs, I have discovered that the Master of Arts in Economics at USC is very close to my interests. This program coincides with my desire to become a highly qualified professional who can accept various challenges that may arise in a globalized society. Admittedly, the Master of Arts in Economics program can allow me to take courses in Macroeconomics, Microeconomics, and Econometrics. I have the business background in economics because I gained my Bachelor's degree in finance and international business, and the economic program can help me for the future career.

I am sure that this will be very useful for my future professional operations and help me understand economic and fiscal issues. I will be glad to receive a solid education in economics and extend my mathematics background knowledge. The program sounds very encouraging to me due to its curriculum, the feedback of its graduates, and reputation. I hope that I will have an opportunity to obtain new experience that can be implemented in my future life and work.

There is no doubt that economic knowledge is the core of the

information society because it explains pros and cons of commercial systems and options of public choice. It helps make choices between equality and efficiency of the electoral process; explains methods of marketing and management, capital markets and money; and it gives directions how to operate in the national and world economy. Providing a review, I was pleased to learn that this program creates excellent opportunity to obtain real-world skills necessary for my future career.

My life experience has shown that it is impossible to live in the modern world and be out of economy. Therefore, the sooner I understand the role of it in my life the more successful I will be in many spheres. I am sure that I have developed economic thinking that manifests in sustainable ideas and views on commercial processes. It is based on my practical experience and relations that are integrated in my everyday life. Admittedly, economic thinking directly affects the ability to manage my money, to make the necessary purchases and prepare financial plans for the future.

My interest in economics is revealed in my potential to navigate in the information space, flexibility, mobility, and adeptness to work in a team. I hope that this program will provide me with a new quality of economic education. I am looking forward to understanding economic laws that can be implemented in real life. Furthermore, I want to explore and reveal the peculiarities of commercial processes that can be reached only through training and education, which will improve my academic, cultural, and technical levels. I should admit that I have good mathematical skills and can remember a large amount of information.

Besides, I am able to identify priorities and lead a team due to my leadership skills and high intellectual capacity. I realize the importance of economic processes in the contemporary society and want to become a part of them. In terms of globalized commercial actions in the modern environment, the Master of Arts in Economics program at USC will be beneficial for my future career.

I believe that my personal traits such as honesty, reliability, accuracy, and fairness are helpful tools in achieving my intended goals. Moreover, I am experienced at operating in diverse working environments and managing people. Therefore, I will appreciate the unique ability to choose this program to satisfy my career interests and reach a high level of economic performance. Luckily, economists are in demand in all enterprises. I can start working in a small organization, and after gaining practical experience I hope to find a more prestigious and highly paid position.

Thank you for your consideration. I am looking forward to hearing from you.

Yours truly,

Your name
